The disclosure is objected to because of the following informalities:

On page 3, line 23, --between—should be inserted after “sandwiched”.

On page 5, line 14, “it” should be changed to “there”.

On page 6, line 16, “channel” should be changed to --channels--.

On page 6, line 21, --to have—should be inserted after “necessary”.

On page 7, lines 10 and 13, “off” should be changed to --of--.

Appropriate correction is required.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 4-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Dall'Argine (European Patent Application 228,351).

Dall'Argine shows in Figure 2 a star-shaped conveyor 1 for conveying containers between machines having a plurality of indentations 7 located between spaced plates 29 and 30 and vacuum is applied to hold the containers in the indentations.

Re claim 4, the containers are held in place over a predetermined arc.

Re claims 5 and 6, it is inherent and well known to have either a separate drive or common drives for know machines.

Claims 2 and 3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
